

review of document publishing

state of charter for new works/documents

milestones

only one missed

MIB

~~add variable in the~~

add new OID in the ipfixObservationPointObsParamIdTo
in the ipfixObsPointTable

→ Pan said put in changes move it to IESG

config

updates for YANG for the IPFIX protocol

PSAMP: want to conform to PSAMP protocol and
not add extra info for techniques

removed samplers & filters which are not
in 5476

SCTP ordered Delivery option removed

removed ability to remove

move
SCTP
order/un-ordered
to mailing
list

11-Nov-2009

IPFIX wk

WGHC on config document

then send it to the netmod list
for their review

WGHC on the config doc now

Per Stream SCTP

added new options which specify handling
of templates & reliable vs. unreliable
usage

informal last call ; 1 week list

(document has already been last called)

then send it to Dan R. to forward

Structured Data

logical semantics

send logical operation argument to mailing
list

Structured data cont

do updates on logical semantics
to the list

the move to WGLC (on list)

Mediation Problem Statement

ask on mailing list for any comments
then pass to IESG if there
are no objections

Mediation Framework

no comments / decisions on presentation

anon

1) added security considerations section

2) received anon technique comments
to be added in -01

no comments

11-Nov-2009

IPFIX WG

Flow selection

skipped

Link layer monitoring

goal is to publish IE's for
better layer 2

data Link Frame Type
data Link Frame Size
data Link Frame Section

don't need new IANA registry for
data link Frame Type

create an RFC in the working group
more effort

submit RFC to IESG w/out working group
+ ask for WG review

don't actually need an RFC at all to
get new IE's from IANA
but needs expert review

link layer review

maybe Ethernet set of IE's should be taken up by WF

don't want it as a WG item

recommend to authors to create final draft then WG will help find IETF reviewers including IPFIX before submission to IANA

Protocol for Mediators

multiple obs Domain Question
↳ answer might depend on mediator function (distributor vs. aggregator)

template mapping
↳ managing templates w/ aggregation, transport change, etc.

time

open issues

anonymization, flow key mgmt, sampling rate mgmt, intermediate aggregation & correlation process

11-Nov-2009

IPFIX WG

Protocol Mediators

so the framework will not have those choices

framework will have to be updated based on this work

might this make framework not make its WG LC until this is resolved

Benoit & Sverger think
